Abstract (en)

[origin: US6637940B1] The invention relates to tubular packaging, especially for dry food stuff, which contains the product in a plastic tube that is closed by welding, whereby the packaging comprises a tearing aid which is located in the area of a weld seam. The packaging is also provided with a label whose side facing the weld seam is configured as a curved tearing edge which is suited for intercepting a tear, said tear starting from the tearing aid, and for guiding the same to the edge of the packaging.
