Abstract (en)

[origin: WO0010068A2] The present invention is designed to overcome these problems and provide an electronic form of commerce that provides acceptable levels of security while at the same time permitting anonymous electronic transfers of money substitutes. In particular, the present invention comprises a new form of electronic money, new forms of electronic counterfeit protection, a new storage device that may, but which does not have to be, used with this new form of electronic currency, an electronic currency generator and an apparatus for tracking incoming cash reserves.

[origin: WO0010068A2] An electronic form of commerce that provides acceptable levels of security while at the same time permitting anonymous electronic transfers of money substitutes, including a new form of electronic currency (3 & 4), new forms of electronic counterfeit protection, a new storage device (20) that may, but which does not have to be, used with this new form of electronic currency (3 & 4), an electronic currency generator (17 & 18) and an apparatus for tracking incoming cash reserves (21).
