Abstract (en)

[origin: EP1125736A2] The machining appliance (1) comprises a pick-up device (3) with drive mechanism which is moved by the drive mechanism's first drive unit (9) into a first operating position in which the workpiece (5) is picked up or released, and into a second operating position in which the workpiece is conveyed to, or removed from, a holder in the machining appliance. The drive mechanism (7) has a second drive unit (13) also displacing the pick-up device.
