Abstract (en)

A fastening device which prevents rotational and vertical displacement of a purge ring caused by purge gas exiting the purge ring or caused by other processing conditions. The fastening device comprises a clamp (20) which releasably holds the purge ring (19) together with the wafer support (11,13,14). A pin (21) is inserted into a bore through the purge ring (19), wafer support (11) and the clamp (20) to releasably secure the clamp in place. Slots (22) may be formed in the purge ring (19) to guide placement of the clamp.
