Abstract (en)
[origin: EP1126097A2] Roof skin with a substructure and a level, moisture-proof covering (18), in which the substructure is in the form of boarding (16), a sealing layer (14) which adheres to the entire surface is applied to (16) and the covering (18) is fixed onto layer (14) with a permanent elastic bond. An Independent claim is also included for a method for the production of this roof skin by coating the entire surface of the boarding with an adhesive, elastomer-curing synthetic resin to form the sealing layer (14) and then sticking the moisture-proof cover (18) on this layer.
