Abstract (en)
[origin: EP1126124A2] The sealing facilities (9) are heated, with heating facilities (11), which are arranged in the endface, edge near the region of the sections (1). They are designed as rubber hollow chamber sections (9) and in at least one hollow chamber a heating cable (11) is arranged. The sealing facilities are designed as rubber sealing strips (12) arranged on the distance holders (6,7), under which a heating cable is laid. The heating cable is arranged between an insulating mat covering the insulating material and the distance holder (6).
