Abstract (en)

[origin: DE10007611A1] The device has a housing (14) with socket (4) supporting a throttle valve (6), and an actuating drive (18). The housing is of injection-molded plastic, and functional components of the actuating drive are contained in the housing and partially enclosed by plastic. The throttle valve is enclosed by the heat-conducting socket, and one functional component and the socket are formed integrally or are connected heat-conducting. The socket is mainly of metal, esp. aluminum.
