Abstract (en)
[origin: EP1126177A2] The system has hydraulic components such as a delivery pump with an impeller wheel in a pump housing and an electronically regulated electric motor whose control electronics are mounted in a housing attached to the motor. An electrical plug connector (4,6) in the form of an electrical interface mounted on the pump housing (2) connects an electronic or electrical component (5) connected to the pump housing to the control electronics (3). Independent claims are also included for the following: a multi-way valve, especially a three-way valve, and a centrifugal pump.
