Abstract (en)
[origin: EP1126212A2] The invention relates to emergency luminaires, and has its objective to provide a secure and simple access to the fastening components and connection of the luminaire, hence facilitating the routine maintenance jobs. This objective is met with a connection between the fluorescent tube (5) and the printed circuit (17) carried out by means of two bands (16) which are mechanically and electrically connected to the printed circuit (17) by means of contact devices (18) which consists of small plates (20) protruding perpendicular to said bands (16) and which at their end are bent and narrow shaping tapered components (21). <IMAGE>
