Abstract (en)
[origin: DE10007370C1] The plug-in onnector has a housing (1) receiving a plug and/or a socket and a cooperating counter-housing, which is provided with a recess for reception of an axially sliding locking pin (9) preventing relative rotation of the housing. The locking pin locates in a reception slot in the housing after sliding it into the locking position, its release only permitted by insertion of a manipulation tool, e.g. a screwdriver.
