Abstract (en)

A dishwasher includes a fan (1) which takes moist air out of the tank through a removal duct (2) and mixes it with dry ambient air taken in through an opening (4) before discharging it through an outlet (3), and it further includes an adjustment device which allows the user to adjust the taking out of moist air through the duct (2) and/or the intake of dry air through the opening (4) so as to change the strength and/or duration of the drying cycle.
