Abstract (en)
[origin: US2002007517A1] Compositions including a cyclodextrin, a carboxylic acid and a cationic surfactant are useful for treating textile fabrics to impart a soft hand and controllable hydrophilic properties to the textiles.

Abstract (de)
Für die Behandlung textiler Flächegebilde eignen sich Zusammensetzungen, welche ein Cyclodextrin, eine Carbonsäure und ein kationisches Tensid enthalten. Den Textilien werden hierdurch ein weicher Griff und steuerbare Hydrophilieeigenschaften verliehen.
