Abstract (en)
[origin: EP1127990A2] The construction has filling elements (18), which are held over outer seals (20) by a press strip (22). A glass groove is arranged between the end faces of adjacent filling elements. An insulation body (30) is arranged at the press strips between the outer seals and lies at the outer seals. The insulation body is spaced from the outer sides of the filling elements, and is dimensioned so that it extends in the glass groove.
