Abstract (en)

[origin: EP1128010A1] The lock has a lock part (2) arranged in a fold groove (1), at which a holder rivet (19) is provided, which co-operates in at least one of two opposite groove side walls (7,8). The holder rivet has at least one clamp projection (21,22), which co-operates with a groove side wall. The clamp projection is arranged in an area immediately below a lock rail (3) of the lock part. The clamp part is fitted at a trapezoid thin-wall sheet metal part (20), which engages a support component (9) and projects in a V-shaped outwards from conically-diverging bars (29,30).
