Abstract (en)

[origin: EP1128011A2] The fixing device has holder piece (18) that is non-rotatably fitted in a conical or stepped recess in the glass pane. The holder piece is connected to the glass surface on at least one side and can be positively or non-positively fixed to hinges holder angles or other lock parts. Intermediate spaces between the depression and the holder piece are filled in with a thermosetting filling mass.
