Abstract (en)

[origin: US2001018287A1] An adapter for a standardised socket, in particular for a RJ45 or RJ11 socket, comprising a housing with an opening as well as guide means bounding an opening, wherein the opening is configured such that one or more plug(s) arranged side by side can be introduced, and wherein the guide means are configured and oriented such that each plug which is introduced has electrically conductive contact with socket contacts of the socket.
