Abstract (en)

[origin: DE10002625A1] Plug-in connectors (20) are fashioned from a metal plate and partially encased in plastic in an extrusion moulding process to produce a connector module (19) with standard outer dimensions that do not rely on the type, number and position of the plug-in connectors. The connector module is inserted into a base blank's recess with dimensions corresponding to the outer dimensions of the connector module.
