Abstract (en)
[origin: WO0028961A1] Disclosed is a composition comprising: (a) an ascorbic acid compound; (b) a charged, reflective particulate material a preferred embodiment of which is coated Titanium dioxide; (c) a structuring compound whose preferred embodiment is a combination of a surfactant and a fatty alcohol; and a cosmetically-acceptable carrier. Preferred use of such composition is a skin whitening composition. Herein, ascorbic acid compound means ascorbic acid or derivatives thereof which have formula: (II) wherein R<2> and R<3> are independently selected from hydrogen and linear or branched alkyl of 1 to about 8 carbons; M<1> is a metal; and x is an integer of from 1 to about 3. More preferably, R<2> and R<3> are independently selected from hydrogen and linear or branched alkyl of 1 to about 3 carbons; M<1> is sodium, potassium, magnesium, or calcium.
