Abstract (en)
[origin: DE19942855A1] The invention relates to a high-pressure fuel accumulator for a common-rail-fuel injection system of an internal combustion engine with several connector openings (5 - 10), in particular connector openings for the addition and removal of fuel in addition to connector openings for sensors and valves etc. The high-pressure fuel accumulator is fitted with a vibration damper (14) to increase the robustness of the high-pressure fuel accumulator.
