Abstract (en)

[origin: WO0030330A1] Processor means (6) arranged to communicate with at least one telecommunication unit (1), to transmit voice messages to the at least one telecommunication unit (1), to present a first menu with a first plurality of options from which a user of the at least one telecommunication unit (1) is allowed to select one, and to present a second menu with a second plurality of options when the user has selected one of the first plurality of options in the first menu, wherein the processor means are arranged to present the second plurality of options as a series of consecutive options with a first option (clip 1) and a last option (clip N), and to start presenting the series of consecutive options a predetermined number of times again when the last option (clip N) has been presented.
