Abstract (en)
[origin: EP1129921A2] The device has a support arm (1) on the train side, which supports a coupling head (4) at one end and has a centring unit (17), which holds the support arm in a base position. The centring unit has a traction device (18,19) arranged on each side of the support arm and fixed to the train on one side and to a bracket (21,22) fixed to the support arm on the other side. The bracket has a bracket arm (23,24) that is connected about a rotation axis and is spring-loaded.
