Abstract (en)

[origin: EP1130206A2] The fastening comprises a first plunger (5) which has at least one holder-claw (16) for engaging with a slide-piece. A second plunger (6) is joined to a connecting part (7) which has a hole (23) for containing part of the first plunger. The two plungers are elastically connected by a spring element (14). The second plunger turns on its lengthwise axis, by means of a lever arrangement (11) and has a catch (8) engaging with a detent (9) for moving the holder-claw in and out of an engaged position in relation to the slide-piece.
