Abstract (en)
[origin: EP1130271A2] The pump or compressor has at least one fly wheel located in the drive housing. An attachment device is provided for exactly positioning the flywheel to a drive shaft (9). The flywheel has a cylindrical recess on its side facing away from the drive and in the region of the drive shaft. The free shaft end of the drive shaft has a central bore with a thread. A cylindrical slitted disc (1) is provided, in whose centre is provided a conical recess designed for receiving a corresponding design.
