Abstract (en)

[origin: WO0121404A1] The invention relates to a compressed air device (6, 8) for a printing machine or a sheet-handling device. Also provided is a cooling device (8) for cooling air which is suctioned by air pumps (26). Said air is pumped by said pumps to a printing machine or to a sheet-handling device and is used for pneumatically operating machine components or for transporting, guiding or turning sheets of paper which are to be printed or to be coated or sheets of paper or another material which are already printed or coated.
