Abstract (en)

[origin: WO0030894A1] Device (51) for hanging an item of clothing, in particular a coat or a jacket, from at least one rod-like headrest support of a seat of a vehicle, and in particular a car, at least comprising a coat-hanger component (52) with a supporting frame, which supporting frame comprises fastening means for releasably fastening the device to the one or more rod-like headrest supports, in which device the fastening means comprise a clamping assembly, which clamping assembly comprises at least one set of clamp halves (33, 34) which can be displaced with respect to one another, and actuating means, which actuating means are designed to displace the clamp halves (33, 34) with respect to one another into an open or closed position, in order to be able to clamp the rod-like headrest support between the clamp halves (33, 34) in the closed position of the clamp halves (33, 34).
