Abstract (en)  
[origin: WO0028146A1] Traffic element with illumination, at least comprising an element body (15) having a transparent plastic component (3) which comprises illumination means (4) encapsulated by the plastic of the component, which transparent plastic component (3) is fabricated by casting a preferably resilient multicomponent plastic in a closed mould. Examples of traffic elements are kerbs, traffic island elements, roundabout elements, a road surface etc. Traffic elements according to the invention are experienced as light-emitting elements.
