Abstract (en)

[origin: WO0112980A1] Disclosed is a high-pressure fuel accumulator (1) whereby the hydraulic connection between the connecting tube (2) and the accumulator chamber (5) is established by means of connecting bore holes (8), thereby reducing load peaks in the region of the intersections of the bore hole (8) and the accumulator chamber (5) in such a way that the pressure resistance of the high-pressure fuel accumulator (1) is increased.
