Abstract (en)
[origin: WO0026887A1] A length of flexible sheet (2) carries a signage indicium (4, 5, 6). The flexible sheet material includes an arrangement of a spaced apertures (3) along its length which has particular advantage in minimising the wind loading effect on the signage. The signage indicium may be preprinted onto the sheet material. In an alternative embodiment, signage indicium panels may be mounted on the flexible sheet.
