Abstract (en)
[origin: EP1132019A2] A container for perfume or other beauty product comprises a perfume-containing body having an aperture provided with a closure member such as a screw stopper or an atomizing dispenser, said body cooperating with a closure element to be superposed on said member to cooperate with that body part in proximity to this latter. The body comprises on a plurality of its sides an element in impact resistant material to protect said body against accidental impact which could damage or crack it. <IMAGE>
