Abstract (en)

[origin: EP1132039A2] A revolving sprinkling assembly for dishwasher includes a sprinkler (S) pivoted at an end of a horizontal duct (C) which is in turn vertically pivoted at its other end to a hollow shaft (A), as well as a device suitable to produce an oscillation of said duct (C) around the axis (X) of said shaft (A) with a mechanism which limits the extent of said oscillation, and at least an actuator means (M) for driving said mechanism.
