Abstract (en)  
Rotating reel offset printing machine comprises printing units having at least one form and one transfer cylinder, at least one folding unit, and at least one electromotor (128) as the drive. For each printing unit at least one of these cylinders is connected to a separate electromotor and this cylinder is either not connected to a further cylinder driven directly or indirectly by a separate electromotor or is connected with a non-driven cylinder. The stator of the electromotor is fixed to an eccentric bearing ring (129) of the cylinder.

Abstract (de)  
Die Erfindung betrifft den Antrieb einer Druckmaschine. Zylinder und Funktionsgruppen sollen mit geringem technischem Aufwand angetrieben werden. Hierzu steht bei Druckeinheiten mit mindestens einem Form- und einem Übertragungszylinder wenigstens einer dieser Zylinder mit einem separaten Elektromotor (128) in Antriebsverbindung, wobei der Stator (127) des Elektromotors (128) an einem exzentrischen Lagerring (129) des Zylinders befestigt ist. <IMAGE>
