Abstract (en)

[origin: EP1132533A2] Process for rinsing a mixing water channel (1) having at least two sections (4, 5) arranged one after the other that can be shut off comprises shutting off the section (4) lying upstream from the section (5) lying downstream by means of a bulkhead so that rinsing can be carried out. After reaching a prescribed dam height in the upstream section of the mixing water channel the shutting off process is abruptly stopped. An Independent claim is also included for a device for performing the process.
