Abstract (en)
[origin: EP1132545A2] Casing material (1) comprises a sheet (2) of metal, especially metal mesh, at least one first transverse reinforcing element (3) on one side of the sheet and at least a second longitudinal reinforcing element (4) on the other side of the sheet. The reinforcing elements are welded to each other through the plate at crossing points (9). At least one reinforcing element consists of an elongated support (5) having a top (7) and a base (6). The top is connected to the base via a spacer (8) and the base is connected to the sheet so that the top is held at a distance from the plane of the sheet. An Independent claim is also included for a device for producing a casing material.
