Abstract (en)

[origin: EP1132560A2] The hinge (1) has a frame (2)-mounted part and a door panel (3)-mounted part, both parts being articulately connected to one another. At least one part has a height-adjustable device with oval fixture holes, through which fixture screws (14) are inserted. The height-adjustment device has a disengageable device, which in a stop position holds the hinge parts (4,6) in a central position relative to the screwed-in fixture screws.
