Abstract (en)
[origin: EP1132681A2] The system has a bearer rail, lights (10) or light parts for inserting or attaching on two opposing sides of the rail and devices for holding lights and/or light parts on two opposing sides at different positions offset along the length of the rail. Some lights are oriented for indirect illumination of a room and some for direct illumination. Independent claims are also included for the following: the use of a bearer rail suspended from a ceiling or similar.
