Abstract (en)
[origin: EP1004664A1] The present invention relates to novel methods and composition that can be used in the biological, experimental and medical areas. More particularly, the invention relates to compositions and methods using lactadherin or variants thereof, or a corresponding nucleic acid, for regulating (i.e., inducing, inhibiting, stimulating, etc.) or monitoring an immune response, more specifically a CTL response, as well as for the delivery of molecules to dendritic cells, in vitro, ex vivo or in vivo.
