Abstract (en)  
[origin: DE19946611A1] The invention relates to a high pressure fuel accumulator for a common rail fuel injection system of an internal combustion engine, with a base body (1) the interior of which communicates with a plurality of connection openings (2). The aim of the invention is to improve the high-pressure stability of such an accumulator. To this end, respective elongated connectors (6) extend through the pertaining connection opening (2) into the interior of the base body (1).
