Abstract (en)

[origin: DE19945785A1] The invention relates to a fuel injection system for internal combustion engines with pressure intensifiers (11). The fuel is conveyed from the low-pressure fuel supply (7) into the injection nozzle (1) via a conveyor line (21) and proportioned in terms of type and quantity with the high-pressure part (5) of the injection pump (3), by means of a control line (9).
