Abstract (en)
[origin: EP1134321A2] The valve operating mechanism, for a sanitary installation, has a closure stopper (2) which is pressed by the user in the closed setting against the force of a spring (4). A ratchet lock in the housing (1) holds the closure stopper (2) in the closed position until released by the operating unit (50), as a push button in the side of the housing (1).
