Abstract (en)
[origin: EP1134338A2] The door has an electrical locking device, an electrical locking element between a fixed door frame and a door panel and a manual emergency lock switch, preferably on the frame, with a housing (44) containing an actuating element and a device for illuminating a transparent actuation surface (43). The illumination device has red light (45a) and green (45b) light units connected so that only the red unit or the green one can be switched on. Independent claims are also included for the following: an electrical locking device.
