Abstract (en)

[origin: EP1134492A2] The fixing device uses a tubular clamp (4) for securing a lamp head to a carrier pipe (3) with the axis (A) of the tubular carrier (1) for the spotlight (2) of the lamp head perpendicular to the axis (B) of the carrier pipe, the electrical supply leads passing through the an opening in the mantle of the carrier pipe and through the center of the fixing device and the tubular carrier. The rotation angle of the tubular carrier relative to the fixing device is limited by a stop device (5.5).
