Abstract (en)

[origin: EP1134627A1] Watch has an analogue display of minutes, hours and day of the month. Display of minutes, hours and day of the month is by means of hands (59, 80, 1) moving in a retrograde fashion centered on the center of the dial. There are three corresponding semi- circular scales (60, 87, 2) for display of the corresponding values on the watch dial. An Independent claim is made for a mechanism for moving three hands in a retrograde fashion over a watch face so that minutes, hours and days are indicated.
