Abstract (en)

[origin: DE10011966C1] The step switch has an insulating cylinder housing with fixed inner contacts and an inner driven switch column (1) with at least one bearing block (3) for a contact carrier or a contact carrier directly mounted via upper and lower two-part clamp rings (4,5) with clamp bolts. Screening rings (14) are arranged on both sides of each bearing block or contact carrier with open sides facing each other and each with an attachment shaft clamped in a clamp groove between the clamp ring and the switch column. Independent claims are also included for the following: a screening ring for attachment to a switch column.
