Abstract (en)

[origin: EP1134850A2] The adaptor (2) has a base plate (6) with a recess (24) for the plug connector (4), contg. a socket (28B) and a plug part (28A), the plate comprising an outer (11) and an inner side (10). The plug connector is so selectively connectable in the recess that either the socket or the plug part are accessible from the outside of the base plate. The plug connector can be secured in the recess by locking strap (40) and a locking recess (38) forming a securing connection. Independent claims are included for the plug connector.
