Abstract (en)  
[origin: WO0034142A1] The invention concerns a sealing closure cap for a container (R) with fixing flange (C) consisting of a cover (1) mounted on a side skirt (2) provided, in its lower part, with snap-on means under said flange (C) and, in its upper part, with a removable tear band (12) produced over a portion of the skirt (2) periphery where it ensures temporary linkage with said cover by providing on the matching portion a hinge (21). The invention is characterised in that the cover (1) bears a locking tab (24) whereof the free end is provided with a retractable fin (25) capable of being urged as a stop element on the flange (C) of the container (R) in fully open position.
