Abstract (en)
[origin: WO0023393A1] A liquid-state efflorescence-inhibiting agent which causes low air-entrainment to a cement composition such as concrete, which has storage stability at low temperatures, and which is excellent in the appearance of strength. The efflorescence-inhibiting agent comprises one or more species of C8-C18 fatty acid alkaline metal salts, wherein the content of the C12-C16 fatty acid alkaline metal salts is not less than 80 % by weight.
