Abstract (en)

[origin: WO0032559A1] A class of cationic ester surfactants is described which has improved hydrolytic stability. In particular, the present invention relates to the use of quaternized alkanol amine ester compositions wherein the ester is based on a secondary or tertiary alcohol, and/or the use of a quaternized alkoxyated alkanol amine ester in detergent, cleaner, personal care, or fabric softening applications.
