Abstract (en)
[origin: WO0032727A1] A hard surface detergent composition cleaning solution for use with a disposable cleaning pad preferably comprising an effective amount of a superabsorbent material, said pad preferably being part of a cleaning implement comprising a handle and said cleaning pad preferably being removable. The detergent composition contains a soil suspending agent, preferably, limited amount of detergent surfactant, the level of hydrophobic materials preferably being kept below about 3 %, and the pH preferably being above about 9, to allow the cleaning solution to be readily absorbed by the superabsorbent material and the composition provides an improved surface appearance. The process of using the detergent composition with such a cleaning pad, and the provision of a kit containing both detergent composition and cleaning pad are disclosed.
