Abstract (en)
[origin: WO0034718A1] The invention discloses drainage means comprising in one aspect a collar (2) which is bifurcated at one end and which has a pipe-embracing through-hole or aperture (8) therein, and in another aspect comprising a tray (30) having in a wall thereof a pipe-embracing recess or aperture (46-52). The collar (2) has raised portions (14) on its upper side which form guide channels directed towards the centre of the collar (2), and the tray (30), which comprises opposed front and rear walls, opposed side walls, and a bottom wall, is provided with a plurality of pipe-embracing recesses (46-52) or apertures in each of said front and rear walls. The collar (2) and tray (30) together form a drainage kit.
