Abstract (en)

[origin: WO0036810A2] The present invention relates to a method for implementing vending of products and services over a telecommunication network, in which method the service provider (106-110) is offered the possibility with the help of a voice response server (105) of providing goods and/or services to clients (101) using a vending procedure based on a value-added calls. According to the invention, during a single call the client (101) is given the facility of selecting with the help of a voice-message menu (105) a plurality of differently priced services or products that are billed to the client (101) in conjunction with his telephone bill, for instance.
